

The figure displays a genomic map of the HLA-DQA1 gene, highlighting Open Reading Frames (ORFs) on both the positive and negative DNA strands. The x-axis represents the genomic position from -100 to 300 kb.

- Positive Strand (+):** Shown in blue, it contains several ORFs. Notable ones include a long ORF starting around 20 kb and ending near 220 kb, and another starting around 40 kb and ending near 180 kb. Other smaller ORFs are scattered throughout the region.
- Negative Strand (-):** Shown in orange, it also contains multiple ORFs. A prominent one starts around 40 kb and ends near 270 kb. Another significant ORF begins around 60 kb and terminates near 240 kb.

A legend in the top right corner identifies the colors: blue for Forward Strand ORFs (+) and orange for Reverse Strand ORFs (-). Vertical dashed lines mark specific genomic positions at 0, 100, 200, and 300 kb.

Negative Strand (-) -
